

FINDING OF NO SIGNIFICANT IMPACT

SAN PASQUAL NEW ROW PROJECT ENVIRONMENTAL ASSESSMENT AND FONSI

San Diego Gas & Electric (SDG&E) submitted a request to the Bureau of Indian Affairs (BIA) for approval of the San Pasqual Band of Mission Indians New Right-Of-Way (ROW) Project which proposes to obtain an easement (ROW) to install, own, operate, maintain, repair, replace, and remove communication facilities and overhead appurtenances used solely and exclusively for SDG&E's internal communications. The easement area includes P212409 and a single span service to a new home, with a width of 12 feet and length of approximately 49 feet. The project will provide new electrical service to Taciana Chavez at 26828 Muckenuway Lane, within the San Pasqual Reservation, Tribal Tract 5011.

Based on the Environmental Evaluation (EE), it has been considered the potential effects of the new ROW on the environment will not have a significant impact on the quality of the human environment. Therefore, in accordance with Section 102(2)(A) of the National Environmental Policy Act of 1969, as amended, an Environmental Impact Statement (EIS) is not required.

This determination is supported by the following findings:

1. The proposed ROW project area is located on trust lands on the San Pasqual Indian Reservation analyzed in the EE.
2. The EE discloses the environmental consequences of the Proposed Action and potentially viable alternative(s); which includes the no-action alternative.
3. As described in the EE, no mitigation is recommended as all evaluated impacts would be less than significant.
4. Federally-listed species were not known to occur within the project footprint as documented in a biological assessment. Therefore, BIA has determined that there will be "no effect" to federal listed species or critical habitat as a result of this project.
5. The BIA determined that the ROW would result in no significant impact to historic properties.
6. Cumulative and secondary effects on soil, water, air, noise, vegetation, cultural resources, and wildlife resources (species and habitat) were considered and determined to be less than significant.
7. In accordance with Executive Order 12898 on Environmental Justice, impacts to minority and low-income populations and communities have been considered, as have impacts to Indian Trust Resources and found to be less than significant.

Determination

It has been determined that the proposed action for the easement (ROW) to construct underground distribution line does not constitute a major federal action that would significantly affect the quality of the human environment. Therefore, in accordance with Section 102(2)(c) of the National Environmental Policy Act, 42 U.S.C § 4321 et seq., an Environmental Impact Statement is not required. This determination is supported by the aforementioned findings described in this FONSI and the analysis contained in the entire administrative record, including the EA, and the mitigation imposed. This fulfills the requirements of NEPA as set out in the Council on Environmental Quality Regulations for Implementing NEPA (40 C.F.R. 1500–1508), and the BIA NEPA Guidebook (59 IAM 3-H, August 2012).
